

Investigator:	James Bremner Phone: (404) 712-9569 Email: jdbremn@emory.edu
Primary Research Interest:	Psychiatry
Description of Research:	We use brain imaging and neurobiological markers to study changes in the brain in PTSD and response to treatment. New research looks at mechanisms of non-invasive vagal nerve stimulation (nVNS) in PTSD.
Relevance to VA:	Our program studies combat-related posttraumatic stress disorder (PTSD), which is highly relevant to the VA mission.
