Investigator:	**Ashley Prichard** Phone: (404) 321-6111 ext. 207570 Email: aprichard3@gatech.edu
Primary Research Interest:	Psychology
Description of Research:	Noninvasive neurostimulation via audiovisual stimuli is a potential treatment for Alzheimer's disease. This research examines neurostimulation in male and female mouse models of Alzheimer's disease by examining changes in the brain's primary immune cells, microglia.
Relevance to VA:	Research Scientist investigating noninvasive neurostimulation treatments for Alzheimer's disease pathology across sex.
